

Present the:

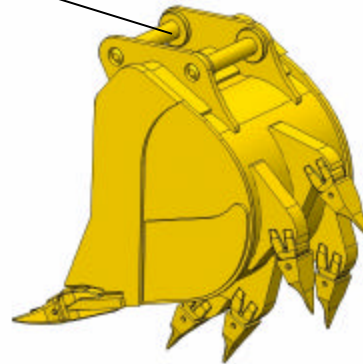

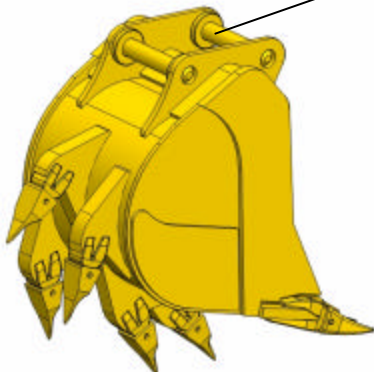

MULTI-SHANK ROCK RIPPER BUCKET

The PSM Multi-Shank Rock Ripper Bucket is engineered to withstand the most uncompromising terrain. Guaranteed to perform, the PSM Rock Ripper Bucket is designed to rip through everything from tundra to the most compact desert soil. Recently reengineered with a fixed pin design, the Rock Ripper Bucket now reduces your overall tip radius. Reduction of the tip radius allows your bucket to regain the digging force it normally would lose when used in application with a pin grabber quick coupler. The PSM Multi-Shank Rock Ripper Bucket comes with Single and Double Tiger tip teeth and can be engineered to fit virtually any excavator or backhoe.

PRODUCT FEATURES:

- High strength low alloy steel throughout bucket
- Wear resistant materials on all impact areas
- Reduced tip radius
- Maximum breakthrough power

Lowered Pin Center Design
For Greater Breakout Force
