

Clamp Bucket Combo

The PSM Clamp Bucket Combination attachment allows operators to remove a hydraulic thumb and a heavy duty bucket as a single unit with any quick coupler system. This attachment design also allows operators to interchange between excavators of similar weight for maximum utilization of an excavator fleet.

PSM has the certified patented rights to this unique design and has been producing them since 1984.

Available in progressive link or no link thumb designs

Thumb and bucket rotate on a common axis for constant grip throughout arc

The versatility of a thumb without the limitations

Fits all coupling systems
