

Demolition Special

Optimize performance with PSM attachments designed specifically for demolition.

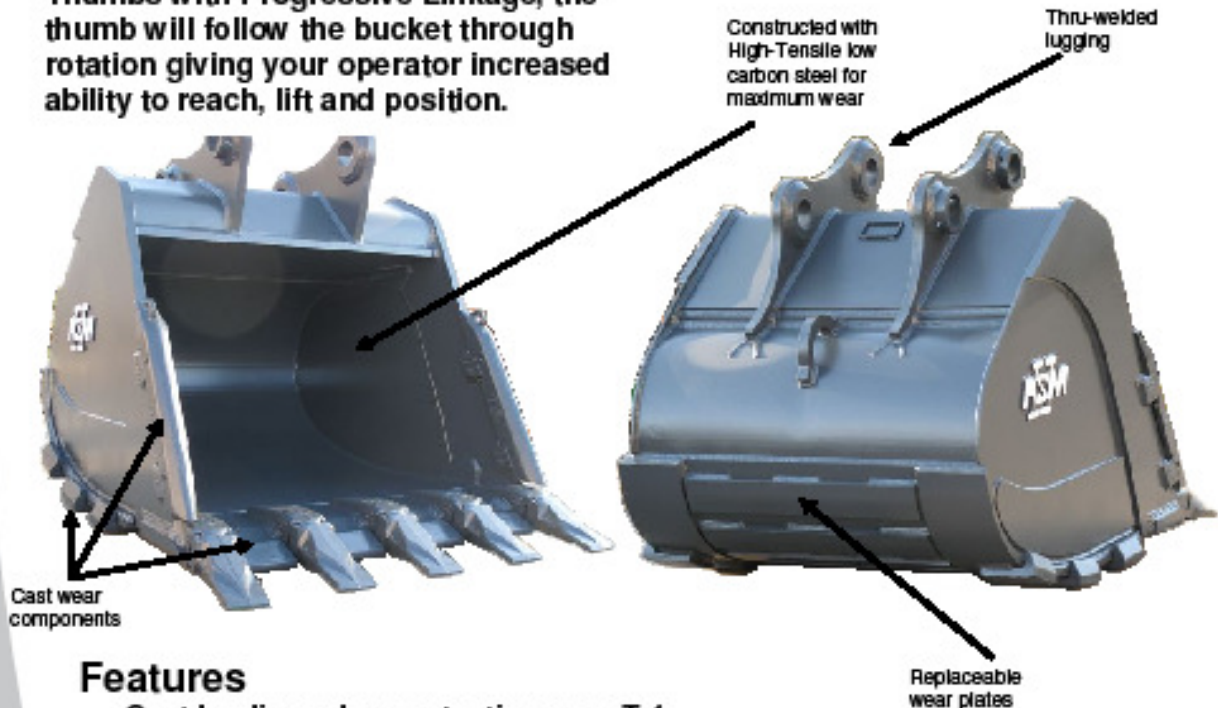

Demolition Specific

Designed for demolition, PSM's buckets, thumbs and quick couplers are engineered to provide long life and durability under the severe conditions demanded of demolition attachments.

When used with our Maximum Rotation Thumbs with Progressive Linkage, the thumb will follow the bucket through rotation giving your operator increased ability to reach, lift and position.

Options (can be brand specific)

- Choice of Teeth
- Leading Edge Shrouds
- Bimetallic Wear Parts

Features

- Cast leading edge protection over T-1 cutting edge
- Easily replaceable cast wear components protecting T-1 structure bucket
- Constructed with all High Tensile Low Carbon Steel for maximum wear
- One piece replaceable outer wear plate (double bottom) with abrasive resistant wear strips forming triple bottom protection
